

[7.3.1] (addition) – Hull machineguns (to include A9 turreted MGs cannot fire at all if the tank is hull down (they are pointing at dirt). Main turret mounted coaxial MGs and commander's weapons can still fire.

[7.8] and Chart [B9] (clarification) – The rulebook is correct. Although [B9] states your tank is also IMM on a "B" result, this was amended to only with an adjusted roll of "0" or less.

Chart [A4] (North Africa) (addition) – In a Defense mission, AT gun results convert to SPGs. However there are no Italian SPGs in 1940, so if on a Defense mission and AT guns are rolled, simply delete them from the force that is attacking you.

Chart [A4] (North Africa) (correction) – The 1941-43 German entries for "6" and "9" should read " 1 AT / 2 INF"

Chart [B1] (North Africa) (correction) – The Die Roll Modifier entry for "+2 Sandstorm" should actually read "+1 Dust Storm".

Tank Mat Cruiser A9 (typo) – There is a small asterisk in the Loader's status box. Ignore it.

Sequence of Play Cards (correction) – Card 2b, section 1. Delete the "(at you with a 1d6 result of "1")." Final sentence should simply read "Enemy that was fired upon returns fire."
