

## Combat! - Errata and Q&A

### 1. Rule 6, Markers, states that:

"• A '1' (red #1) means that the Character MAY fire if it has a loaded weapon and a known target in LOS." (emphasis in the rules)

However, in Rules 7.02 (Rapid Fire), 7.03 (Suppressive Fire), 7.04 (Run & Gun), 7.09 (Grenade) and 7.10 (Smoke Grenade) all state that a red 1 means "a Character with this order will fire each Impulse" or "the Character MUST shoot" or "Friendly Character will throw" (emphasis added by me). So, which is it? Is a red 1 an optional (MAY fire) or is it mandatory (MUST fire)?

Friendly Characters MAY fire, Enemy Characters MUST fire.

### 2. Also, a very small errata I've noticed:

The Sequence of Play on the Player Aid, Step 5, does not list the "a) All Grenades now explode – perform Damage Rolls [see Rule 14.1]." step. Instead, it lists "b) Make a TQC for each Character with the Skill of MEDIC currently in a hex with a wounded Character [see Rule 7.14].", but it lists it as Step a). The Player Aid Card for the Sequence of Play in the same step also leaves out what is identified in the rules as "e) Any Waiting Characters within 3 hexes and LOS of an Alert Enemy Character are now Alerted. Place an Alert Marker on them." All rules in this step after both of these omissions on the PAC are identified with a different letter on the PAC than what is in the rules. As a result, when Rules are referenced elsewhere in the rules regarding the Step 5 End Phase, the rules referenced do not match up with the way things are listed on the PAC.

The rules are correct.

3. "Place a Grenade Marker on the Enemy Character and a Grenade Target Marker on the closest Friendly Character within 3 hexes (chosen randomly if more than one)."

- Page 16 – Rule 10.09

It should say 4 hexes.

4. No rules are given for placing the Wind marker. Simply Roll 1D6, place the Wind marker in any convenient place on the map and face the wind arrow in the corresponding direction on the Directional Compass.

5. *Bocage is listed on the Order/Terrain chart but is not shown in the rule book*

The option to use Bocage in scenarios 8,9 and 10 is missing. Bocage will take more prominence in the campaign rules in Combat!2.

6. Introductory Scenario 1 – Special Rule 10 should say: "During the Enemy Order Phase of Turn 1 only turn Enemy Order cards for their Initiative value. Roll 1D6 to determine the order for each Enemy character."

7. Introductory Scenario 1 – Special Rule 7 should say: "Friendly Characters may set up in any hex located within the triangle formed by Hexes 18.14, 18.19, and 28.19."

8. *Clarification* - When the last card is drawn from the Enemy Card deck shuffle the discards to form a new deck.

### 9. Some Questions came up:

1) Streams are in the rules but do not appear on the charts on the large foldout play aid.

2) Bocage is on the charts but not in the rules. Does this terrain even exist on the maps?

3) the rules say to check the scenario for the US hidden/spotted status, but I cannot find this information in the scenario book.

4) I assume that hedgerow in the rules is the same as hedge on the charts.

5) Is there a stacking limit and does having multiple individuals in a hex affect combat?

6) What are the 4 little directional markers for when there is one large one that is placed on the map?

7) I could not find in the scenarios where the squad 2 markers are used. I assume these are initiative markers.

1. Streams are always in depressions. Always use that line on the player aid.

2. The option to use Bocage in scenarios 8,9 and 10 is missing. Bocage will take more prominence in the campaign rules in Combat!2.

3. The default is always Hidden. Future scenarios may specify otherwise.

4. Correct

5. No stacking Limit and no modification for multiple characters (pretty big hexes)

6. Some scenarios (see Scenario 10) require more than 1 directional marker. 4 are provided so that scenario can be created where enemies are moving (generally) in 4 directions.

7. The Squad 2 Initiative markers are there for future use - if 2 squads are in play - or if you wish to use both squads in a homemade scenario

10. Bad Wound = No Sprint, Run & Gun or Evade (so Sneak Only)  
Light Wound = No Sprint

11. Friendly, Enemy and Neutral Board edges are not defined in the scenarios.

### Intro Scenario 1

Enemy edge = 18.01 and 35.14 Inclusive

Friendly edge = 18.14 and 35.19 inclusive

Neutral edge = all other edges to the playable area other than those mentioned above

### Intro scenario 2:

Friendly = Left hand board edge

Neutral = Top and bottom

Enemy = Right hand board edge

### Intro scenario 3:

Friendly = Left hand board edge

Neutral = Top and bottom

Enemy = Right hand board edge

### Intro scenario 4:

Friendly = Right hand board edge

Neutral = Top and bottom

Enemy = Left hand board edge

### Scenario 1:

Friendly = Left hand board edge

Neutral = Top and bottom

Enemy = Right hand board edge

### Scenario 2:

Friendly = Right hand board edge

Neutral = Top and bottom

Enemy = Left hand board edge

### Scenario 3:

Friendly = Left hand board edge

Neutral = Top and bottom

Enemy = Right hand board edge

### Scenario 4:

Friendly = Left hand board edge

Neutral = Top and bottom

Enemy = Right hand board edge

### Scenario 5:

Friendly = Right hand board edge

Neutral = Top and bottom

Enemy = Left hand board edge

## Combat! - Errata and Q&A

### Scenario 6:

Friendly = Left hand board edge

Neutral = Top and bottom

Enemy = Right hand board edge

### Scenario 7:

Friendly = Right hand board edge

Neutral = Top and bottom

Enemy = Left hand board edge

### Scenario 8:

Friendly = Left hand board edge

Neutral = Top and bottom

Enemy = Right hand board edge

### Scenario 9:

Friendly = Left hand board edge

Neutral = Top and bottom

Enemy = Right hand board edge

### Scenario 10:

Friendly = none

Neutral = Top and bottom

Enemy = Right and Left hand board edges

**12.** Is a Friendly Character that was Wounded, but has successfully Received Medical Aid from a Friendly Character with the Medic Skill, still considered Wounded? Meaning, does he still have the Movement Restrictions that an untreated, Wounded Character has, and still count as Wounded if the scenario has VP consequence for Wounded Friendly Soldiers?

Is a Friendly Character that was Wounded, but has successfully Received Medical Aid from a Friendly Character with the Medic Skill, still considered Wounded?

Meaning, does he still have the Movement Restrictions that an untreated, Wounded Character has, and still count as Wounded if the scenario has VP consequence for Wounded Friendly Soldiers?

Characters that are Badly wounded but treated may not sprint. Treated Light wounds have no penalty.

They do NOT count for VP consequences - another good reason to heal them.

**13.** Is the rout marker missing a red box? Right now it looks like it says a unit loses all of its leadership (black box) and can't fire (red circle), but there is no effect on its troop quality. If the box is missing, what number should it have? No there is no modifier to TQ for Rout.

**14.** Does a routing enemy unit still makes checks after entering cover to see if it changes orders to Duck Back, per case 1 of 10.13?

Yes it does

**15.** Clarification – If an Friendly Character enters a hex with an enemy character in a stat of waiting: The Enemy Character is flipped (if necessary) and is now alerted. If the Enemy Character is Unprepared then the next time they activate they will not get to act.

*Example – A Friendly Character enters a hex containing an Unprepared, Waiting Enemy Character late on Impulse 1. The enemy is immediately flipped to reveal Soldat X and is now considered Alert. A Melee marker is placed in the hex. During Impulse 2 the Enemy Character gets to activate first but will NOT act this Impulse as he was Unprepared.*

**16.** Clarification – Officer: Lt. and Hptm, NCO: Obfr

**17.** Introductory Scenario 1 – Special Rule 8 should say "Place the Compass counter in hex 19.02 with "1" pointing to Hex 18.01."

**18.** Missing - Scenario 2 – Special Rule should say "Place the Compass counter in hex 02.03 with "1" pointing to

Hex 02.04."

**19.** Clarification –

If a Character has a Grenade Near or Grenade Far Marker on them and they leave the hex they currently occupy then remove the marker.

**20.** Clarification – Foxholes are Rough Terrain.

**21.** Clarification –

An Enemy Character with Charge Order will ignore rule 9.4 (Entering Terrain)

**22.** A Berserk Character will not take prisoners. If the Berserk Character is alone with a Character, of the other side, who surrenders then they will kill them.

**23.** Rule 10.13 #4 should read "The Character enters Rough terrain with a Sprint Order."

**24.** On impulse 2 my character with a sprint order has to move 2 spaces.

Can he move 1 hex into a hedge hex and then into an open hex? if so would he then have his order changed to Duck Back.

or

Is he stopped in the hedge hex and then having his order changed to Duck Back.

I think its the first option based on rule 1.07

"Character with this order may enter Rough Terrain types but the Character MUST then Duck Back at the end of the Impulse."

based on the part "Duck Back at the end of the impulse".

The correct answer is:

He is stopped in the hedge hex and has his order changed to Duck Back.

**25.** Section 11 – Terrain – Page 17

Delete the sentence

"Cover: LOS traced down a hexside between 2 hexes containing LOS blocking terrain is considered blocked."

**26.** Optional Rule

"If an Enemy Soldier is about to fire and his chance of hitting reduces his WS to below zero(0) then he must first make a TQC. If he fails he will fire otherwise he does nothing"

**27.** Clarification

For Rule 9.4 (Entering Terrain) the TQC is taken in Step 4 a) iii

**28.** Clarification

Foxholes & Craters - are supposed to be treated like Depressions; that is, no LOS if the Character in the Foxhole or Crater has Sneak, Hide, Rally, or Reload Orders.

**29.** Both the Order/Terrain Chart and the Spotting Chart have "Berserk Charge" listed as a column heading, and no simple "Charge" listed.

I assume "Berserk Charge" is meant to be just "Charge", correct?

You are correct. It should just really be Charge.

**30.** Enemy Grenades should work the same as Friendly Grenades

- Change the 5<sup>th</sup> paragraph in rule 10.09 to:

"Roll 1D10. Add 3 to the result if the target hex is not in LOS of the

throwing Character. If the final result is 9 or more, the Grenade will scatter 1 hex in a random direction. Roll 1D6 for direction and place the Grenade Explosion Marker in the resulting hex. Then make a roll against the thrower's Grenade WS for each Character in the hex with the grenade. Normal Order/Terrain modifiers apply to this roll. A successful roll places a Grenade Near marker on the Character. A failed roll places a Grenade Far Marker."
